Georgios Klonis

Bachelor's Student in IE University | 2nd year | Computer Science &
AI | High Potential Award
Madrid, Community of Madrid, Spain

Summary

I have always been interested in mathematics, algorithms and physics, while being a competitive person. Today, I am studying Computer Science and Artificial Intelligence (BCSAI) in IE University in Spain, while having a High Potential Award scholarship.

I started learning to code at the very young age of 12 years old, participating in National Robotics competitions, though it was always more of a hobby than a career focus. The first year of high school, was when I really got into coding and I realised software engineering was the right field for me. Since then, I have been practicing by myself, creating projects and with my robotics team. We have achieved a lot, such as many 1st place awards in the national Robotics competition and won the 1st place Startup Idea Award on the Word Robot Olympiad 2022.

I am familiar with a variety of programming languages, including Python, C, Swift/SwiftUI, PHP and SQL but I am always adding new skills to my repertoire.

Experience

ECTOS

Full-stack Developer
December 2024 - Present (10 months)
Madrid, Community of Madrid, Spain

EIT - European Institute of Innovation and Technology
iOS App Developer
June 2022 - July 2022 (2 months)
Athens, Attiki, Greece

Education

IE University

Bachelor's degree, Computer Science and Artificial Intelligence
(BCSAI) · (August 2023 - May 2027)

Ekpedeftiki Anagennisi - Antonopoulos School

High School Diploma, A-Level Physics (A*), Mathematics (A*) and Further
Mathematics (A) · (September 2017 - June 2023)
